MIKROTALASNA REVIIJA

MICROWAVE REVIEW

Sadržaj / Table of Contents

The Smith Chart		
	<i>by Aleksandar Marinčić</i>1
PBG Structures for Microstrip Circuits	8
	<i>by Vesna Radišić, Yongxi Qian and Tatsuo Itoh</i>	
Circuits with Varactor Diodes for Frequency Tuning in Dielectric Resonator Oscillators	12
	<i>by Nenad Popović</i>	
Discussion of Some Experimental Methods for Permittivity Measurements on 12-Tungsto-phosphoric Acid Hexahydrate in the Frequency Range 8-12 GHz	20
	<i>by V. Likar-Smiljanić, R. Biljić, T. Čajkovski and D. Čajkovski</i>	
Report from the 2nd International Workshop on Transmission-Line Matrix (TLM) Modeling	24
	<i>by Vladica Trenkić</i>	

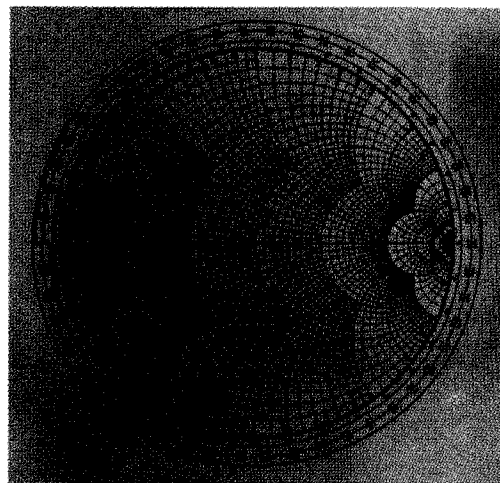

Mikrotalasna revija

Časopis Jugoslovenskog udruženja
za mikrotalasnu tehniku i tehnologiju
i Jugoslovenskog IEEE MTT-S Chapter-a
(ISSN 1450-5835, UDK 621.3.049.77)
Adresa: Bulevar Mihajla Pupina 165b, Beograd
Tel: +381 11 135 420 ext. 122, 138
Fax: 381 11 311-5884
e-mail:branka@imtel.co.yu
Časopis izlazi dva puta godišnje.

Branka Jokanović, Editor
Ivana Radnović, Technical Editor

Uređivački odbor:
Editorial Board:

Prof. Christos Christopoulos
The University of Nottingham, U.K.
Dr Nikola Dekleva
Hyperbaric Medical Center, Yugoslavia
Prof. Aleksandar Marinčić
Faculty of Electrical
Engineering, Belgrade, Yugoslavia
Prof. Bratislav Milovanović
Faculty of Electronics, Niš, Yugoslavia
Prof. Aleksandar Nešić
Institut IMTEL, Beograd, Yugoslavia
Prof. Magdalena Salazar-Palma
Universidad Politecnica de Madrid, Spain
Prof. Andre Vander Vorst
Universite Catholique de Louvain, Belgium

Cover: The Smith chart

Phillip H. Smith, an engineer at Bell Telephone Laboratories, radically simplified transmission line analysis by developing the graphical aid named after him.
