

FROM THE EDITOR'S DESK

We would like to express our great pleasure to be guest-editors of this special issue of Microwave Review, dedicated to the international IEEE Conference TELSISKS 2001.

The fifth Conference on Telecommunications in Modern Satellite, Cable, and Broadcast Services, TELSISKS 2001, was held on 19-21 September, 2001, at the Faculty of Electronic Engineering in Niš. A wide list of topics, such as wireless communications, antennas and propagation, RF and microwave technique, multimedial communications, signal processing, etc. made this Conference the right place for foreign and Yugoslav experts to exchange their results and ideas. This year's conference is characterized by the high level of scientific papers and the attendance of distinguished, world-known names as authors of papers and lecturers.

The idea for this special issue of Microwave Review was to collect a number of high quality papers from TELSISKS 2001 Program, especially in the fields of RF and microwave technique, antennas and propagation and applied electromagnetics. We had a difficult task to select this 13 papers from a wider list of excellent papers in mentioned fields. It should be noted that all selected papers were very well evaluated in the reviewing process before the conference.

We would like to express our gratitude to the authors of these selected papers and all other authors for their contribution to the success of TELSISKS 2001 Conference.

Finally, you will find two *Calls for papers* in this issue. The first one is related to the next TELSISKS conference, which will be held in Nis, in September 2003. The second Call for papers gives the information about ICEST 2002, an international conference that will be held in Nis, in October 2002. We truly expect that both conferences will be very successful from the aspect of papers' quality and participants' attendance.

Guest-editors,
