Niš is an administrative, economic and cultural centre of the South-East Serbia, some 240 km away from Belgrade. It is known as the greatest gate between East and West, since it is on the crossroad of the three important directions of the international highway, railway and air traffic.

This city stands on the site of the Roman settlement of Naissus, the birthplace of Emperor Constantine the Great, in the valley of the Nišava river. There is a number of the ancient monuments in the city that testify about its stormy history.
